Cyber-security Analyst | Software Engineer | SOC Analyst

Cloud-driven cybersecurity analyst with AWS-scale experience and an engineer's mindset for spotting threats, closing gaps fast, and strengthening security with precision, speed, and intention.

WORK EXPERIENCE

JetBlue Airways. • Apr 2025 - Aug 2025

Ground Operations Crewmember

- Supported 20+ daily flights with zero safety violations across baggage handling, marshaling, and loading ops.
- Completed aircraft and equipment inspections with 100% FAA and JetBlue compliance.
- Reduced turnaround delays by 15% through coordination with flight, gate, and maintenance teams.

Amazon Web Services • Jun 2022 - Nov 2023

Software Engineer

- Collaborated with cross-functional teams to streamline escalation procedures; improve response times and ensure compliance with security standards.
- Developed AWS CLI automation tools that reduced incident response time by 40%.
- Deployed AMI/HM instances across 31 regions to support millions of daily transactions under strict SLAs.
- Led root-cause and impact analyses on high-priority incidents using CloudWatch, logs, and API metrics.
- Mentored and onboarded junior engineers, accelerating their ramp-up by 30%.

Software Engineer (Intern)

- Shipped 4 production UI components in React + TypeScript used across the AWS Console.
- Performed 20+ code reviews while upholding 90%+ test coverage on all team deliverables.

Spectrus • May 2019 - Aug 2019

Software Engineer (Intern)

- Built optimized MySQL data models that cut query times by ~30% and improved data scalability.
- Enhanced a biotech web app used by 20+ engineers by streamlining workflows and improving usability.

PROJECTS

Light-weight Port Scanner

- Built a command-line TCP Port Scanner to automate the rapid identification and reporting of open network ports on a target system.
- Implemented socket programming to perform fast TCP connection attempts, successfully determining port status (open/closed) and providing associated service names.

SKILLS

Operating System (OS): Linux (Ubuntu/Debian/Kali), MacOS, Windows

Artificial Intelligence (AI): ChatGPT, Claude, Gemini

Cyber Security Toolkit: Nmap, Splunk, Wireshark

Software Engineer Toolkit: AWS, Java, MQL, Node.js, Python, React.js

EDUCATION

Per Scholas

Cyber Security Program
Nov 2025 - Mar 2026

Hack.Diversity

Software Engineer Program
Dec 2021 - Jun 2022

Suffolk University

Bachelor of Arts in General
Studies of Physical Science
Aug 2017 - May 2022

CERTIFICATIONS

CompTIA CySa+

Splunk+
