

HECTOR DARIEL MEDINA

• Software Engineer • (857) 249-8135 • _____ • _____

SKILLS

Programming language:

Java, JavaScript, Python

Database & OS:

PostgreSQL, MongoDB - MacOS, Windows, Linux

Languages:

English (Native), Spanish (Native)

PROFESSIONAL EXPERIENCE

Amazon Web Services

Boston, MA

Software Development Engineer L4

Sept. 2022 – Nov. 2023

- Developed robust APIs and CLI commands to swiftly mitigate incidents and restore customer file systems availability using Varia scripts to streamline shell scripts and Mechanic CLI. Used: **Java**
- Worked closely with developers to deploy new HM/AMI instances across 31 global regions and monitored pipeline stages, ensuring optimal performance and scalability of AWS services.
- Drove technical excellence by investigating and resolving customer and system-generated tickets, and updating runbook documentation to restore file system availability.
- Actively contributed to Agile ceremonies (daily scrums, syncs, and design reviews) and collaborated on cross-functional incident resolution strategies, reinforcing a DevOps culture of continuous improvement.

Software Development Engineer L4 (Intern)

June 2022 – Sept. 2022

- Build essential UI components: 'CreateVolume', 'UpdateVolume', 'CreateFileCache', and 'CreateSVM' to enable customers to manage storage resources directly through the interface. Used: **TypeScript, JavaScript**
- Collaborated with an Agile team of developers, testers, and analysts to deliver high-quality software solutions promptly.
- Monitored multi-region deployment pipelines using AWS tools, ensuring smooth rollouts and rapid feedback loops during staged releases.

Hack.Diversity

Boston, MA

Hack.Diversity 2022 Fellow/ Ops Lead

Dec. 2021 – Aug. 2022

- Accepted into the 2022 Hack.Diversity Fellowship integrates Boston's innovation, corporate, civic, academic, and philanthropic sectors for career leadership and workforce development.
- Transformed client requirements into technical specifications, developing a robust MERN stack web application. Used: **MongoDB, JavaScript, Node.JS, React.JS**
- Formulated schema and implemented a data access service for accurate CRUD operations. Used: **MongoDB**
- Crafted and deployed front-end architecture to support user interface concepts with 100% accuracy.

Spectrus

Beverly, MA

Software Engineer (Intern)

May 2019 – Aug. 2019

- Conducted a thorough analysis of a startup-focused web application for biochemist engineers, facilitating functions like sample viewing, project updates, access to history, and client invoicing.
- Utilized expertise in planning and designing logical and relational database models using MySQL, ensuring optimal data management and system performance.

EDUCATION

Suffolk University

Boston, MA

Bachelor of Arts in General Studies: Concentration in Physical Science

Aug. 2017 – May 2022

Clubs: Computer Science Club, African American Student Council, Mathematicians Society

Certifications: IBM Full-Stack Developer IBM Cloud Computing Certificate, Using Python to Access the Web, Python Classes, and Inheritance, Data Structure and Algorithm, Object-Oriented Programming
