

HECTOR DARIEL MEDINA

• Software Engineer • <https://hirehectormedina.com/> • Hectormedina24@icloud.com • [linkedin.com/in/hectormedina24/](https://www.linkedin.com/in/hectormedina24/)

SKILLS

Technology and Frameworks:

Java, Jest, JavaScript, TypeScript, [React.js](#), [Node.js](#), AWS

Database & OS:

MongoDB - MacOS, Windows, Linux

Languages:

English (Native), Spanish (Native), Mandarin(Beginner)

PROFESSIONAL EXPERIENCE

Amazon Web Services

Boston, MA

Sept. 2022 – Nov. 2023

- Gained strong exposure to large-scale distributed architecture and developed APIs and AWS CLI tools that mitigated incidents and restored customer file system availability. Skills: **Java, [Node.js](#), AWS**
- Wrote unit and integration tests for **AWS CLI** commands and internal **APIs** to validate functionality, edge cases, and error handling, ensuring robust automation during incident response. Skills: **Jest**
- Assisted closely with developers to deploy new HM/AMI instances across 31 global regions, monitored pipeline stages, and ensured the performance and scalability of AWS services. Skills: **CI/CD Pipelines**
- Performed log analysis and resolved tickets to restore file system availability. Skills: **Troubleshoot**

June 2022 – Sept. 2022

- Built UI components: ‘CreateVolume’, ‘UpdateVolume’, ‘CreateFileCache’, and ‘CreateSVM’, enabling customers to manage storage resources via the AWS console. Skills: **TypeScript, [React.js](#)**
- Integrated form data validation and managed **RESTful API** request states (loading, success, error) to deliver a smooth and reliable user experience across multi-region deployments. Skills: **Test Automation**
- Used Logs and **kubectrl** to troubleshoot failing pods, analyze container crashes, and monitor service health across multi-region **Kubernetes** deployments. Skills: **CloudWatch Logs**
- Diagnosed network segmentation issues by analyzing subnet configurations, VPC peering, and security group rules across cloud environments. Skills: **Subnet, VPC**
- Reviewed and submitted code to uphold quality and test coverage before deployment.

Hack.Diversity

Boston, MA

Dec. 2021 – Aug. 2022

- Accepted into the 2022 Hack.Diversity Fellowship integrates Boston’s innovation, corporate, civic, academic, and philanthropic sectors to foster career leadership and workforce development.
- Translated client needs into technical specs and built a full-stack **MERN** web application.
- Formulated schema and implemented a data access service using **MongoDB** for accurate **CRUD** operations.

Spectrus

Beverly, MA

May 2019 – Aug. 2019

- Conducted a thorough analysis of a startup-focused web application for biochemist engineers, facilitating functions like sample viewing, project updates, access to history, and client invoicing.
- Utilized expertise in planning and designing logical and relational database models using **MySQL**, ensuring optimal data management and system performance.

EDUCATION

Suffolk University

Boston, MA

Aug. 2017 – May 2022

Certifications: **AWS Certified Developer - Associate, IBM Full-Stack Developer, Data Structure and Algorithm**
