Software Engineer | Security Engineer | Port Agent

Cybersecurity Analyst and Port Agent driven by an engineer's mindset for securing complex operations with precision and speed.

WORK EXPERIENCE

Intercruise Shoreside & Port Services • Jan 2026 - Current Port Agent

- **Synchronized** communication between Vessel Masters, local port authorities, and third-party vendors to ensure 100% on-time arrival and departure performance
- Managed critical maritime documentation via the **Vessel Entrance and Clearance System (VECS)**, maintaining a zero-error rate in federal and local regulatory filings.
- **Facilitated** complex logistical data entry and manifest auditing, ensuring accurate reporting for customs and border protection agencies.

JetBlue Airways. • Apr 2025 - Aug 2025

Ground Operations Crewmember

- Supported 20+ daily flights with **zero safety violations** across baggage handling, marshaling, and loading ops.
- Completed aircraft and equipment inspections with 100% **FAA** and **JetBlue compliance**.
- **Reduced turnaround delays by 15%** through coordination with flight, gate, and maintenance teams.

Amazon Web Services • Jun 2022 - Nov 2023

Software Engineer

- Developed AWS CLI automation tools in Java that reduced incident response time by 40% by **optimizing resource provisioning and diagnostic workflows**.
- Managed and deployed AMI/HM instances across 31 regions, ensuring **secure cloud infrastructure automation** and **high availability** for millions of daily transactions.
- Led root-cause analysis (RCA) on critical incidents using **CloudWatch logs and aggregation tools** to identify patterns, minimize MTTR, and **improve system reliability**.
- Shipped 4 critical UI components in React.js + TypeScript for the AWS Console, **focusing on enhancing the self-service experience** for cloud administrators managing complex environment.
- Performed 20+ code reviews while upholding 90%+ test coverage on all team deliverables.

SKILLS

Operating Systems and Security Operations: Linux, Windows, RCAs, SIEM, SOAR, Wireshark, Nmap

Access Control and Trust Architecture: Active Directory, IAM (Least Privilege), SSO/MFA Integration, Zero-Trust Architecture

Programming Languages and Automation: Git, APIs, Python, Java, JavaScript, TypeScript, SQL

AppSec and Modern Frameworks: CI/CD, React.js, Node.js, Web Application Security

CERTIFICATIONS

CompTIA CySA+, Splunk+, Software Engineering

PROJECTS

Light-weight Port Scanner • Dec 2025 - Present

- Built a multi-threaded TCP Port Scanner in python capable of scanning 1,000 ports in under 5 seconds.
- Implemented socket programming to perform fast TCP connection attempts and determine port status.

EDUCATION

Per Scholas

Cybersecurity Program
Boston, MA
Nov 2025 - Mar 2026

Hack.Diversity

Software Engineer Program Boston, MA
Dec 2021 - Jun 2022

Suffolk University

Bachelor of Arts in General Studies of Physical Science
Boston, MA
Aug 2017 - May 2022
